The Training Kit

Here are a few comments from satisfied customers:

"*The Training Kit* is the finest computer literacy product that I have seen to date. It does what it says—trains."

—Computer Trends

"If I were to recommend software for the Commodore 64, I would begin and end with KTC's *Training Kit* and *Starter Kit*. One teaches you how to operate the computer and peripherals in a fun way (Training Kit), the other gives you every application you might want to start with including games and music (Starter Kit) for $20 each. Simply incredible!"

—Joystick Jolter Review

"For computer illiterates like myself, *The Training Kit* has been an answer to a prayer. In fact, I've written Commodore Corporation and asked them to include it with each computer that they sell."

—Dr. Jerry Shelter
Hamilton, Ontario

"We use *The Training Kit* to train our teachers too."

—The Hebrew Academy of Long Beach
Long Beach, New York

"Because we don't have enough computers to go around, some of our teachers are making a video using *The Training Kit* so that more of our students can learn at once. Thanks for a great product!"

—Vincentown Schools
Vincetown, New Jersey
